Configuring Rather Than Designing

Vacuum End Effectors VEE

WWW.SCHMALZ.COM/VEE
Overview of Highlights

**Individual configuration**  
- Flexibly configurable, perfectly coordinated individual components  
- Variable number and positioning of the suction cups  
- Hose-free vacuum distribution  
- Optional integrated vacuum generation available

**Reduced construction and manufacturing efforts**  
- Online configurator for designing the end effector in just a few minutes including the creation of CAD data and parts lists  
- Minimizes configuration and production time by more than 80%  
- Reduces manufacturing costs

**Extremely lightweight**  
- Complete end effectors weighing as low as 150 g  
- Designed for high-speed applications with accelerations up to 10 g (100 m/s²)

**Outstanding hygiene properties**  
- FDA compliant material (high performance thermoplastic)  
- Excellent resistance to alkaline agents

**Assembly service**  
- Upon request, we can deliver your custom-configured vacuum end effector VEE as a complete unit

VEE Online Configurator  
**Configuring Rather Than Designing**

1. Enter workpiece data  
2. Select the gripper layout  
3. Select the vacuum suction cups  
4. Define the suction cup positions  
5. Select a connection  
6. Generate 3D data – That's all!

With the VEE online configurator, you arrive at an individually tailored end effector solution with just a few mouse clicks.

**Your benefits**  
- Live 3D preview of the configuration  
- Creation of a 3D PDF data sheet including a parts list and CAD data  
- Simple importing in your consisting construction  
- Quick request for proposal (RFP)

Vacuum End Effectors VEE

Application

Vacuum end effector with bellows suction cups SPB4f handling pouches with many wrinkles and a low filling degree

Vacuum end effector with bellows suction cups SPB4 and stabilization elements handling unstable flow-wrap packaging

Vacuum end effector with bellows suction cups SPB4f handling pouches

SYSTEM COMPONENTS FOR QUICK AND COST-EFFECTIVE DESIGNING OF VACUUM END EFFECTORS FOR HIGHSPEED PACKAGING PROCESSES

• Pick-and-place applications with Delta, Scara and articulated robots
• Fully automated filling of cardboard boxes in case packers
• Primarily used in secondary packaging processes
• Transporting products into top-loading machines as well as in cardboard box and tray aligners
• Use in flexible packaging machines with frequent format changes

Vacuum End Effectors VEE

Design

Vacuum suction cups SPF / Bellows suction cups SP(O)B1
For intrinsically stable and slightly unstable cardboard boxes and packaging

Flat suction cups SPF
Bellows suction cups SPB4(-f)
For bags and flexible packaging

Vacuum suction cups SGPN
For films, blister packs and other sensitive packaging

Bellows suction cups FSG / FSGA
Universal suction cups for various packaging applications

### Schmalz Vacuum Generator ECBPi

#### Intelligent Extension with Matching Vacuum Generator

Configure and connect VEE with ECBPi easily – individually for each application.

1. Collaborative robot (all common cobot models)
2. Robot flange for mechanical connection of the electrical vacuum generator ECBPi
3. Flange adapter plate
4. M12 8-pin plug connection or terminal block as digital interface between the ECBPi and the robot
5. Flange for gripper connection
6. Flexibly configurable grippers from the modular system for vacuum end effectors VEE

Vacuum End Effectors VEE

Starter Set

Whether for use directly in a robotic system or as handy design tool – with the VEE Starter Set you have all of the most important components for quickly assembling your effector right at your fingertips.

Contents

120-piece starter set with all of the components necessary for installing up to two VEE vacuum end effectors, including:
- 8 vacuum suction cups SPB4f-30 for bags and flexible packaging
- Lockable quick-change adapter with bayonet mount

Supplied in a sturdy plastic case with detailed assembly instructions. Part no.: 10.01.36.00030

Technical Data and Design Data

Technical Data
