

Installation guide for ringtones on an Android smartphone

ADD A NEW RINGTONE TO YOUR ANDROID-SMARTPHONE

1. First connect your phone to your computer to transfer the files.
2. There should be a "Ringtones" folder on your phone. In this folder you can copy the ringtones. If there is no folder named "Ringtones" on your phone, you will need to create it. Pay attention to the correct capitalization.

SETTING THE RINGTONE ON THE ANDROID SMARTPHONE

1. Navigate to "Settings" -> "Sound and Notification".
2. In "Ringtone" or "Phone ringtone" you will find a list of ringtones, including the ones you have added. Here you can select the "Jumbo Power" ringtone of your choice.
